

# AR Laptop User Manual

## **Introduction and Getting Started**

Welcome to your new AR Laptop, featuring the latest technologies and ergonomics for comfort and efficiency. This manual will guide you through the initial setup and use of your laptop.

### **Initial Setup:**

- Connect the charger to your laptop and plug it into an electrical outlet to ensure a full charge.
- Press the power button located on the upper right side to turn on your laptop.
- Follow the on-screen instructions to complete the Ubuntu setup assistant.

## **Hardware Overview**

Your AR Laptop is designed with the following ports and components (refer to the diagram on the next page):

- USB ports, HDMI output, power input, and audio jack.
- An ergonomically designed keyboard and touchpad for comfortable use.

Specifications include a high-performance processor, ample memory, and expansive storage capacity.

## **Software and Operating System**

The AR Laptop comes pre-installed with Ubuntu, a user-friendly, powerful, and secure operating system.

Basic Operations:

- Use the activities corner to access applications, search for files, and customize settings.
- Install additional software through the Ubuntu Software Center.
- Regular system updates can be performed via the settings panel.

## **Troubleshooting and Diagnostics**

Troubleshoot common issues:

- If the laptop does not power on, check the battery charge and ensure the charger is connected properly.
- For overheating issues, ensure the laptop's air vents are not blocked and consider using a cooling pad.
- Wi-Fi connection problems can often be resolved by restarting your router or laptop.
